JLS Now Offers PMMI Certified Training

York, PA - JLS Automation recently completed PMMI's Certified Trainer Workshop, held during PACK EXPO International in Chicago.

"Our customers will benefit from more structured training programs which will lead to more retention and less downtime," said Tim Govan, Service Manager. "The training has given us the ability to better prepare and plan for future customer training needs. We are also now more equipped to identify critical training procedures that will benefit our customer's specific needs."

"Having the PMMI certification takes our service and support to another level, adds value and provides a competitive advantage", adds JLS President/CEO, Craig Souser.

About JLS Automation

JLS Automation provides custom vision-guided robotic solutions for the food packaging industry. Known for hygienic packaging solutions designed for harsh sanitary environments, JLS offers both primary and secondary packaging solutions. Multiple patents have been awarded for robotic tooling and the innovative PIVT™ system (patent pending) can detect leaking vacuum packed products. Our Design for Agility® philosophy focuses on offering simple, user-friendly solutions to complex packaging challenges. Learn more at www.jlsautomation.com.
