JLS Demonstrates Innovation in Case Packing during Pack Expo 2012

[JLS Automation](http://www.jlsautomation.com) of York, PA announces their participation in Pack Expo 2012 held in the McCormick Place in Chicago, Illinois from October 28-31, 2012. JLS Automation will be exhibiting in the North Hall in Booth #3338. JLS will also exhibit a **Heron** Tray Loading System with Alliance Partner, [Reiser](#) (Booth #1648).

In response to their customers' increasing need for flexibility in their packaging operations, JLS will demonstrate the company's **Osprey** Case Packing System. According to Craig Souser, President of JLS, "Our customers demand more than the traditional packaging automation. Our Design for Agility philosophy comes from this understanding. The resulting packaging systems are designed to evolve to meet the demands of the customer's business. The **Osprey** is a great example of our attempt to bring innovation and "real world" technology to the market".

The **Osprey** system eliminates manual product handling functions, including many elements of product and/or package inspection, and can be integrated with existing packaging lines, or as a part of a complete "turn-key" packaging system. The **Osprey** is a major expansion for JLS flowing from the success of their **Talon** and **Heron** primary packaging systems in the meat, frozen foods, cheese, and bakery industries.
