### JLS Automation Will Demonstrate Food Packaging at Process Expo

[JLS Automation](#) of York, PA announces their participation in Process Expo 2011 held in the Chicago's McCormick Place from November 1st-4th, 2011. JLS Automation will be exhibiting in Booth #4227.

In response to their customers' increasing need for flexibility in their packaging operations, JLS will demonstrate the company's [Talon Packaging System](#). During Process Expo, the system will be packaging a natural sausage link product into foam trays. According to Craig Souser, President of JLS, "We hear from a lot of our customers that they're tired of seeing robots handling plastic pucks at trade shows. As we did during Pack Expo 2010, we'll be demonstrating a system very similar to a "real world" fresh or frozen food packaging line. We believe this helps our customers and prospects get a true understanding of how robotics can help them meet their production demands, improve food safety, and be able to easily accommodate new product introductions'.

The **Talon** system eliminates manual product handling functions, including many elements of product inspection, and can be integrated with existing packaging lines, or as a complete "turn-key" packaging system. An integral part of the **Talon** system, the **Impulse** Multipick end of arm tool (EOAT) has been developed to achieve higher picking effectiveness, greater throughput speeds, and improved food contact suitability.

Overview of the JLS Automation **Talon** Packaging System:

- Easily Configured to Integrate with Numerous Infeed and Packaging Machinery Configuration
- **Impulse** EOAT (Mechanical or Vacuum) Designed to Handle:
  - Meat, Poultry, and Dairy Products (USDA approved)
  - Frozen and Prepared Foods
  - Candy, molded and enrobed chocolate
  - Bakery products, cookies and crackers
- High Reliability provided by the ABB IRB 360 FlexPicker

*JLS Automation is a leading supplier of Packaging Systems for the Food Industry including High Speed Picking, Product Feeding Systems. JLS is a member of PMMI and FPSA as well as a Strategic Partner for ABB Robotics.*
